2 Encls.

20th., May, 1897.

Dear Sirs,

I am in receipt of your letter of the 19th. inst., submitting for the Committee's approval the plan of the steel boiler you are about to construct for the S. Tug "DUNCAN", and with regard thereto I am directed to acquaint you that provided angles be fitted at the bottoms of the furnaces as shown amended on the plan; the plan in other respects be adhered to, and the boiler be built under the usual conditions of survey and testing and to the entire satisfaction of the Society's local Engineer Surveyor, the same will be approved by the Committee for the intended working pressure of 90 lbs per square inch.

The plan referred to is returned herewith, and after noting same kindly forward it again to this Office for the Surveyor's guidance during construction.

The usual special survey order form is also enclosed for your signature.

I am, Dear Sirs,

Yours faithfully,

Messrs S. Hodge & Sons,

Union Iron Works,

MILWALL, E.
