

Date 7th April 1898.

Supplement to First Entry Report
on the Steam Ship Roman

Report No. 8678

of Leith

COMPASSES.

Distance between dynamo or electric motors and standard compass 51 feet

Distance between dynamo or electric motors and steering compass 116 ft.

The nearest cables to the compasses are as follows:—

A cable carrying _____ Amperes _____ feet from standard compass _____ feet from steering compass

A cable carrying _____ Amperes _____ feet from standard compass _____ feet from steering compass

A cable carrying _____ Amperes _____ feet from standard compass _____ feet from steering compass

Have the compasses been adjusted with and without the electric installation at work at full power Yes.

The maximum deviation due to electric currents, etc., was found to be 4 Four Westly degrees on North East course in the case of the standard compass and 5½ Westly degrees on North West course in the case of the steering compass.
