

12

New Smack "Robert Stadden"
32 Tons built at Laustadwell and
recommended for the 11 A class,
viz 9 years under Table A, 1 year for
Roof and 1 year under the Mixed Material
Rule.

Although this vessel has been built
under a Roof she does not appear to be
entitled to an extra year for the same,
as the requirements of Section 48 have
not been complied with, as to the time
occupied in Building &c; and as
the sketch of Midship Section was
not submitted for the approval of the
Committee in the first instance, as
required by Section 34 she is not eligible
strictly to a year under the Mixed Material
Rule, but considering the large quantity
of 12 years material in the vessel - viz
the whole of the frame, beams, topsides,
sheerstrakes, clamps, and ceiling in
the lower hold - and the strong
recommendation of the Surveyor, it
is respectfully submitted that this
appears to be a case for the favorable
consideration of the Committee with
view to an additional year being
assigned under the Mixed Material
Rule viz 9 years under Table A
and 1 year under the Mixed Material Rule.

10 A

9 + 12 years material -
