

Smack "Robert Stadden" 32 Tons  
built at Laustadwell and recommended  
for the 11 A Class.

This vessel has been built under  
a roof but as she has only been  
three months under construction  
she is not entitled to an extra  
year for roof, and as she was  
not built under special survey  
in accordance with the rules she  
is not eligible for an improved  
class under the Mixed Material  
rule.

She however appears eligible  
to be classed 9A

The equipment is not complete
