Leith. 1<sup>st</sup> July 1885

Mess<sup>rs</sup> The Surveyors  
Newcastle on Tyne,

Gentlemen,

In reply to Mr. Hull's letter  
of the 28<sup>th</sup> ult. re S.S. "Pseudale"  
I have to acquaint you that  
I have examined the safety valve  
raising gear, and the gear for the  
stop valve, both of which work  
satisfactorily.

The engines have been under  
steam and the bilge and feed  
pumps are now in good working  
order.
