Cables for Messrs W.

Dobson's No 56 Vessel

REGISTER,
LONDON.

REC'D 13 DEC, 92

ANSR 13/12

Dear Sir,

We duly rec^d your favour of 10th inst, for which we thank you.

Further in reference to ours of 9th inst, Messrs Dobson wire us that vessel sails tomorrow & threaten us with heavy damages. We are in an exceedingly awkward position, & if it is possible, we should be extremely obliged if you would kindly wire us as early as possible in the morning, if you can accede to our request. Also if you would please wire instructions to your surveyor at Newcastle, for which purpose we enclose stamps.

We must apologise for our seeming impatience, but our position is very serious.

We remain Dear Sir

Yours very truly
S Taylor & Sons

Chain Cables for W. Dobson & Co

No. 56 $\frac{1}{2}$

19/12/92

Reg. wire

It is submitted Mess Taylor & Sons
be informed that the weight of the 122 fms
cable weighing 153 cwt has been approved -
but the 150 fms cable which is nearly 4 cwt
light has not been approved, and the Builders
have been informed that this cable must be
replaced by a cable of the proper weight to entitle
the vessel to be classed with the Figure 1 in
the Register Book.
