

34 Satters Road
 Gosforth
 Newcastle
22/6/02

Dear Mr Gordon,

I replied
 this morning to the
 Secy's letter re. the
 S.S. "Eidu" & am just
 writing you to explain
 the reason of the difference
 in Moulded depth from

that given in our first
 Entry Report & that in
 the vessel.

When Mr. Hay & I made
 up the Report we just
 made up the depth
 of hold & moulded depth
 from the registered dimensions
 merely & fill in the
 spaces not thinking the
 same would be required
 for increase of class.
 With regard to the
 difference in Moulded depth

Now from what is given
in the Newcastle Leuboard
Report I think that can
be accounted for by
the vessel having, I
understand had at
least twice practically
a new bottom fitted
into her.

Hoping these explanations
will be satisfactory
Yours Truly
W. C. Suddon
