

14th September 1854

We respectfully recommend, that Mr Menzies be written to, for a more explicit report as to the nature, extent and locality of the defects he observed in the floors and 2nd futtocks of this ship, as without such information we shall be unable to recommend this ship for classification for any definite N^o of years.

We also think it desirable that the opinion of Mr Menzies as to the N^o of years to which the vessel is entitled, be ascertained.
