Hold Beam She

New Wood Ship "Lady Vere de Vere" 1008 Tons
built at Nova Scotia

This vessel is 8.1 depths in length and by the Rules Section 39 should have diagonal plates let into the Frame s: as compensation for not fitting these, the whole of the planking, ceiling, shelves, waterways, keelsons &c are made exceptionally large. It is respectfully submitted that she is worthy of the favorable consideration of the Committee for the 7A Class. The third bower anchor is much lighter than allowed by the rules, but should the crew space reduce the tonnage below 1000 Tons the cables and the remaining anchors would be in excess of the requirements of the Rules. S.A. N.O.
