Sps Ham August 26th 1841

75

26 Aug Mr Charles Graham
Sir

Rec 27 I give letter of the 26th inst., enclosing report of
Survey on the Maun. by Mr Percell, it contains
by differs very materially from mine, and I should
say was far more correct, for a man inspecting a
byal whilst building and before any thing is
dressed on the plank is the best judge of the
Timber used.

When the Master requested me to survey
the byal, he informed me Mr Carter built her
I then called on him to give me such information
as he could, as to her planing frame & general
build, it is next to an impossibility to know
by what Oak from any other, when it is covered with
Tar and all sorts of dirt as this byal was.

There appears to be a twofold difference in the
bark beams, but some of them was more than reported by
me, and I thought it a fair average, the Nelson P
believe to be a New one, as there appears to be no
scarp in the one reported by Mr Percell, and I know
the byal have been on shore some built and got done
it is probable she then had a New Nelson, and was built
and been bottled, and an entire bark built in her,
It appears all the planing is American Oak by Mr

TPS1030-0030

name is

bark acquired and then from deputy

Parables Survey, if it is so, Mr Carter have given me wrong information, either wilful, or from forgetfulness I don't know which.

I am always as careful as possible in the examination of papers, particularly New ones, and nothing should induce me to send you a false or even a flattering report when the paper did not deserve it, the papers I may be deceived in, or any one else, I am sorry you should have read any report from me but what is perfectly correct but assure you it is from wrong information received from Mr Carter, and this I think will be of sufficient cause and fully satisfy you.

The "Hannat" had only 30 fathoms of Chain 15 fathoms to each Cable, and a spare lower, and Stream Cable, I expect her back to this port again, from America, when I will inform the Master.

I am Sir

Your Obedt Servt

John Robinson

Frame is well squared and per for

Parables Survey, if it is so, Mr Carter have given
me wrong information, either willful
or not I don't know as
I am also

in the examination of
and nothing should induce
a man to flatter myself
deserve it, Mr Capels I may
say else, I am sorry you should have seen
report from me but what is perfectly
best of course you it is from wrong inform
and from Mr Carter, and this I think
of sufficient course and fully satisfy

The "Hannah" had on
of Chain 15 fathoms to each Cable
down, and Stream Cable, I say
this part again, from Amuse
inform the Master

I am
Yours Dr.
J. O.
