T. L. AINSLEY,
Chart and Nautical Warehouse.

By whom R. Caggs & Sons Ltd.
Mill Dam,

South Shields.

This is to Certify that we have Adjusted the Compasses on board of the steel Screw Steamer "RIVER ARAXES" of London for Magnetic Deviation, and same are now in perfect Order. Tables showing the effect of such Deviations have this day been handed to the Master.

The Deviations have been ascertained on the various Courses both with the Dynamo stopped and with it running full speed with electric current "on" and "off" all circuits in the vicinity of the compasses.

The Deviations so found are practically identical under both conditions and are in accordance with the tables furnished this day to the Master.

Dated at South Shields, this 16th day of August 1913

T. L. AINSLEY

NAUTICAL INSTRUMENT MANAGER
AND
ADJUSTER OF COMPASSES IN STEEL VESSELS.

To the Honourable
The Board of Trade.
