

Messrs. Harland & Wolff's Yard Nos. 1016 & 1017.  
-----

Amended plan of fore body columns and girders  
submitted by the Belfast Surveyors.

It is submitted the Surveyors be informed that the  
scantlings and arrangements as shewn and amended will be  
approved, provided they be carried out to their satisfaction.

They should also be informed with reference to the  
final paragraph of the Builders' letter that the thickness of  
the bulb angle stiffeners on the floors and intercostals was  
increased on account of the loads to be carried by the pillars  
and to be in conformity with the usual practice for stiffeners  
under pillars of this size. In view of the Builders'  
statement, however, regarding their previous vessel and as the  
material has been delivered, the stiffeners might be accepted  
as proposed, except those under the pillar on frame 37, where  
it is considered these stiffeners should be fitted of the  
increased thickness, or equivalent arrangements made, having in  
view the very large load carried by this pillar.
