BELFAST.

Dear Sirs,

Nos. 1016 and 1017.

We duly received your letter of 31st May, returning print of the Fore Body Columns and Girders for the above vessels, duly signed and approved as amended, for which we thank you.

Since submitting this plan to you one or two changes have been made in the depths of the beams, so as to keep these uniform to suit the insulation; also, one or two of the columns have been shifted in position, and we, therefore, send you a further print showing modified scantlings of the girders to suit the new arrangement, and shall be glad to have your confirmation that these are all in order.

With reference to the modification to the scantlings of the bulb angle stiffeners on the intercostals in way of pillars from .40 to .50, please note that the material for these stiffeners has been delivered and in the majority of cases has been worked. We shall, therefore, be glad to have your approval that it will be in order for us to work to the sizes originally shown on the plan as this is similar to the previous vessels built for the same Owners, and which had 34" spacing against 30" in these vessels.

Yours faithfully,

For HARLAND AND WOLFF, LIMITED,

Lloyd's Register  
Foundation
