Imperial House,

Donegall Square East,

Belfast, 2nd September 1938

The Secretary,  
LONDON.

Dear Sir,

With reference to the approval given in your letter of the 25th May of the Crank and Thrust Shafts for Messrs. Harland & Wolff's Nos.1016/17, it is presumed that a yield point of the crank web material of not less than 14 tons per sq. inch will be acceptable. The letter of approval asks that the yield be not less than 50% of the tensile.

We are, Dear Sir,

Yours faithfully,

The Surveyors.
