Surveyors to Lloyd's Register of Shipping,
BELFAST.

Dear Sirs,

M.V. NOS. 1016-1017.

For the above twin screw motor vessels we shall be pleased to learn that you have no objection to particulars of auxiliary engine crankshaft as shown on Drg. No. 45427, two copies of which are sent herewith.

There are three engines in each vessel, of the four-stroke cycle, single-acting Diesel type, which are for driving electric generators.

Particulars of the engines are contained in the accompanying sheet. We would point out that the crankshaft is in every respect similar to that for M.V. Nos. 957-8 which received your approval on 23rd February, 1935.

Yours faithfully,

For HARLAND AND WOLFF, LIMITED.
