Master & Owners,  
S/S "PORT MELBOURNE"

Dear Sirs:

This is to certify that on Friday, the 9th instant, I made an underwater examination of the port and starboard propellers and the rudder on the above vessel at Berth No. 9, West Saint John.

One blade on the starboard propeller was found to be damaged and broken at the tip, approximately 6" wide x 1" deep.

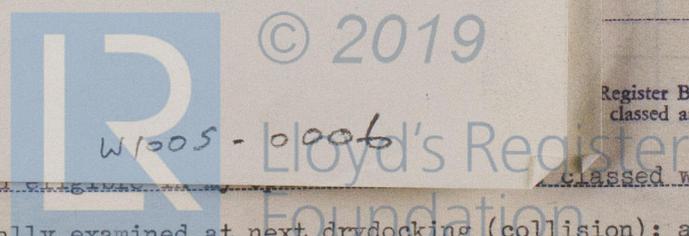

No damage could be seen on the port propeller or the rudder and they appear to be in order.

Yours truly,

George Cossaboom
