

Star of Victoria 1st Entry

During the pressing work of vessel
 to receive cargo the survey could not
 be completed.

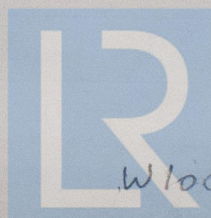

The Ash Chute-Could not
 be tested and the W & doors on Bunker
 bulkhead tried, owing to coal in bunkers.

The slight leaks observed
 under the Shelter deck have been touched
 up, but a thorough test could not be
 obtained as the cargo loading was
 proceeding, and a proper water test would
 probably have caused damage to cargo
 lying in bays round the vessel.

The owners are aware of
 these circumstances, and will comply
 fully with these small matters im-
 mediately on vessel's return.
