Steel Screw Steamer No. 623 now being built by Messrs. Cochrane & Sons with a view to class 100A1, "Steam Trawler".

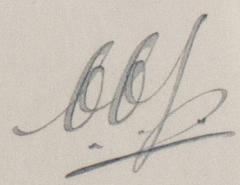

-----  
Equipment No. = 4793.  
-----

A letter has been received from the Hull Surveyors enclosing one from the Builders in which they state that the anchors supplied to this vessel have been ordered by the Owners  $8\frac{1}{2}$  cwts. and  $6\frac{1}{2}$  cwts. instead of  $7\frac{1}{2}$  cwts. and 7 cwts. respectively as required by the Rules.

It will be noted that the total weight of the two bower anchors supplied is  $\frac{1}{2}$  cwt. in excess of the Rule requirements.

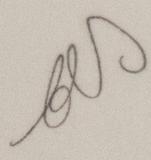

It is submitted that in the circumstances the anchors supplied by the Owners merits the favourable consideration of the Committee for the figure 1.
