Navals Francais

CAEN, 29th September, 1925.

Dear Sir,

We have handed to you for your information B.V. certificate concerning the chains of the cargo vessel "VENDEMIARE".

These chains have to be supplied with the certificate of B.V. only in accordance with the terms of the contract with the Owner of the vessel.

But we notice on the one hand that the total length of the chains, namely:- 450 metres is slightly higher than that required by your Rules (448 metres), and on the other hand that the total weight of the chains, namely 18367 K. is slightly lower than the weight required by your Rules, namely 18550 K., that is to say a difference of 183 K. or 1% of the total weight.

It is difficult for such a slight difference in the weight to add a length of chain, the weight of which would be 1200 K., that is to say 1000 K. more than is required by your Rules.

We hope in view of the small difference in the weight of the chains, which we have supplied to the vessel, that you will not raise any difficulties in issuing a certificate to the vessel.
