Engineer Sur

August 21<sup>st</sup> 15

A. P. Cornick

Messrs The Power Plant Co. Ltd.  
I have been to examine at their  
works on June 12<sup>th</sup> and subsequently  
the 41 wheels, shafts & pinions  
intended for Messrs Richardson  
Bros & Co's No. 4234.

Upon the completion of the work of  
cutting the teeth, the wheels and pinions  
were packed up temporarily in a truck  
and run by motor for some days and  
of examination by the undersigned  
were found to most excellent work.  
The wheels, shafts & pinions appear to  
be in good condition. The brgs of the wheels  
have looking loose but they are not considered  
to be of a serious nature. The shafts are stamped  
with 2770. The pinions 3033 E.
