

Lloyd's Register of Shipping.

Collingwood Buildings, Newcastle-on-Tyne.

8th August 1929

The Secretary

Sir,

The steamers "PORT DARWIN" and "PORT CAMPBELL" are being fitted with "BAUER WACH" auxiliary turbines here and the alterations to the engine room tank and bulkheads will be done as in the cases of the "PORT DENISON" & the "PORT AUCKLAND" recently altered in this port. I shall be glad if the plans of the alterations carried out in "PORT DENISON" & 1918

"PORT AUCKLAND" could be sent here for guidance in the survey. 1922

I may add that the work is being done in the case of the later ships by another firm - Messrs R. W. Hawthorn Leslie & Co. - who are unable to supply a copy of the plans without considerable trouble.

I am Sir,

Yours faithfully,
G. H. Brown
