

Enclosure.

30th July, 1948.

S.  
Dear Sirs,

Motorship "UDDU"

I am in receipt of your Report No. 6166 on this vessel, but before submitting the case to the Committee I would inform you that First Entry reports on hull and machinery will be required.

The vessel was built to standard design under the supervision of the Society's Surveyors but was not classed owing to unseasoned timbers being used in the construction. To assist you therefore, I enclose a pencilled First Entry Report on a similar case and would suggest that in preparing the desired report for the "UDDU" you should make any amendments which may be necessary to meet the case as a result of the verification of the scantlings and arrangements.

When forwarding your reports you should also state whether the machinery particulars quoted in my letter of the 16th April last have been verified and found to agree.

Yours faithfully,

Clerk to the  
Classification Committee.

The Surveyors,  
OSLO.
