PORT OF

SUNDERLAND.

29th April, 1918.

The Surveyors,
Middlesbrough.

Dear Sirs,

I have to acquaint you that the new steamer
"WAR LOCH", Messrs. Craig Taylor & Co's S.S.No. 198, has
left here for the builders yard for finishing and that
to complete the machinery survey the tunnel requires to
be made watertight and the hold and tunnel suction to
be fitted.

If pocket bunkers are now being fitted in the
stokehold I shall be glad if you will kindly amend
the "smallest distance between boilers or uptakes and
bunkers or woodwork" in the 1st Entry report.

I am, Dear Sirs,

Yours faithfully,

L. H. Davis

*no pocket-bunkers
