Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

23rd April, 1935.

Dear Sirs,

S.

With reference to your Report No.23611 on the steamer "FRANCOIS TIXIER" ex "LITTLE EVY", I have to point out that this vessel appears to have one starting air receiver of 800 litres capacity.

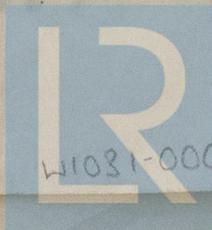

As this is considerably less than the starting air capacity usually provided, I shall be glad if you will state whether you have satisfied yourselves that the receiver is capable of supplying compressed air for 12 consecutive startings of the engines without replenishment.

I am, Dear Sirs,

Yours faithfully,

pro Secretary.

The Surveyors,
ROTTERDAM.
