

S/S "UALAN"

Date of build of vessels not built under survey.

It is the practice to insert the year of build only.

In the case of the above named vessel however, as the launching date is known, there is no reason why the date of build should not be inserted as 1918- 5mo, which will be in accordance with the practice followed in recent cases where vessels have been built under the survey of the British Corporation only, but taken over by Lloyd's Register before being assigned a class.
