

32

Enclosure.

10th May, 1950.

S.

Dear Sirs,

I have to acknowledge the receipt of your letter of the 5th instant respecting the Steamer "CRANLEY", the contents of which are noted.

In the circumstances telegraphic instructions were sent to you yesterday as per copy attached.

The specification and plan of shell drillings and reports on Forms 8 & 9 are being prepared by Mr. Wilson and will be forwarded to you as soon as possible. In the meantime I may say that Mr. Wilson states the shell plating is badly holed in a number of places, and the frames require particular attention.

Yours faithfully,

Clerk to the
Classification Committee

The Surveyors,
BELFAST.
