

"MARISO"

It is submitted the LEITH Surveyors be requested to verify the diameter and spacing of the rivets connecting the frames to the side shell, to furnish the scantlings of the after peak bulkhead, hatch coamings with stiffeners, stays and shifting beams; particulars of stem, sternframe and rudder, weights and tests of the anchors, length, size and tests of the chain cables on board. If the vessel is strengthened for navigation in ice the arrangements and particulars should be reported. If a capacity plan is available a copy should be forwarded.
