

Messrs. C.v.d. Giessen & Zonen, Yard No.661.

Electrical Installation.

It is proposed to employ fuses manufactured by Messrs. Siemens, Messrs. Hazemeyer and Messrs. Hapan, which are not approved types. However, in view of the size and nature of the installation it is considered no exception might be taken to these fuses in this instance.

IT IS SUBMITTED the Rotterdam Surveyors be informed that provided the installation be as shown and amended on the plans, and to their satisfaction, and the remaining requirements of the Rules for Electrical Equipment be complied with, the plans merit approval.

They should also be informed that no exception will be taken in this instance to the proposed Siemens, Hazemeyer and Hapan fuses, provided they are installed to their satisfaction.
