pro

16, "ROBERT DOLLAR". I return ^{your} ~~all~~ reports on this vessel and I have to request that you will fill in ^{the} ~~the~~ particulars required on the last page of the First Entry Report and at the same time state whether the bilges are protected by cement and whether section 48 of the Rules has been complied with. It is concluded that the boiler room tank does not require to be examined internally as this is stated, on the 1st page of your report on form "8", to have been done, also that the lower part of the cross bunker is to be examined, but you should state if ~~this~~ is so.
