

PORT OF MELBOURNE,

10th June, 1942.

THIS IS TO CERTIFY that

----- B.P.FIELDEN -----

the undersigned Surveyor to this Society did at the request of
Master and Agents (Vacuum Oil Coy. Pty. Ltd.) survey the single screw
vessel "MADRON" - 5894 tons gross of Kristransand, for the purpose of
endorsement of the vessel's Load Line Certificate to allow deeper loading
permitted upon by the Norwegian Government.

The vessel was surveyed concurrently with Annual General Examination
dry dock and afloat and her condition is considered suitable for the
deeper loading contemplated.

Alterations required by the Committee of Lloyd's Register of
Shipping, as follows, have been satisfactorily carried out:-

The fore and aft gangway supports have been fitted with cross
diagonal transverse and longitudinal bracing of 3" x 3" x .40" angles.

Side scuttles in superstructures have been fitted with cast iron
framed deadlights where these were found to be necessary.

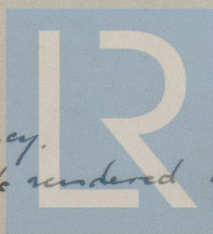

A suitable provisional endorsement dated 10th June 1942 has been
attached to the vessel's Load Line Certificate.

(Sgd.) B.P.FIELDEN

Surveyor to Lloyd's Register.
