Drillings at ends to be made in the vicinity of the peak bulkheads.

The Committee decided at their meeting on the 28th March 1944 that this vessel's class should be omitted from the reprint of the Register Book in view of the fact that she was then in enemy occupied territory.

The ROTTERDAM Surveyors report (9.41) this vessel placed on slipway, and bottom coated, and on account of damage through sinking by explosives, fire, and preparations to refloat the vessel, renewals or repairs effected to shell, deck and tank top plating, frames, floors etc.

Shell plate G.7 (s.s.) which was repaired by the insertion of a shaped plate was recommended to be specially examined at the next dry docking.

The requirements of the 2nd SPECIAL SURVEY No.3 due 6.41 complied with including the drilling of the shell plating with results, as above, which are satisfactory.
