

S.S. "STANASFALT", Messrs. Palmers S.B. & I. Co's No. 989.  
-----

The rudder fitted in this vessel is of the Simplex balanced type, in which the connections of the rudder are made entirely by electric welding, instead of the customary riveted construction.

The plan of the rudder was approved in December last, subject to the consent of the Owners being obtained, and to a suitable notation being made in the Register Book.

It is submitted that a suitable notation in this case would be "Rudder electrically welded".

The consent of the Owners to the adoption of this rudder ~~must~~ <sup>must</sup> be obtained, as previously required.

Dr. Nov. 6/5/29.
