E(3)2

4 - NOV 1948

E1

November 2, 1948.

Dear Sirs,

S.S. "OPHENIA"

I acknowledge receipt of your letter of October 29 and print showing design of German main boiler valve, spindle and cover for this ship, from which it is noted that the arrangement does not comply with the Society's requirements in respect of having an outside screw and means of indicating whether the valve is open or closed. If practicable, the design should be modified to normal British practice.

You omit to state whether all the other steam valves are similar.

Yours faithfully,

ASSISTANT SECRETARY

The Surveyors,
HULL.
