

REPORT ON ELECTRIC FITTINGS.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL) 28 FEB 1928

Date of writing Report 27 Feb 28 When handed in at Local Office 27 Feb 28 Port of Keith

No. in Survey held at Keith Date, First Survey 14 Nov 1927 Last Survey 16 Feb 28 1928

Reg. No. 43266 on the T. S. S. "Wynner Brooke" (Number of Visits 8)

Built at Keith By whom built Carnegie & Ferguson Ltd. Yard No. 264 Tons Gross 1669.76 Net 712.52

Owners Sarawak S.S. Co. Port belonging to Huiching

Electric Light Installation fitted by Group Curtis & Co. Ltd. Contract No. When fitted 1928

System of Distribution Two wire ✓

Pressure of supply for Lighting 110 ✓ volts, Heating 110 ✓ volts, Power 110 ✓ volts.

Direct or Alternating Current, Lighting Direct ✓ Power Direct ✓

If alternating current system, state frequency of periods per second

Has the Automatic Governor been tested and found efficient when the whole load is suddenly thrown on or off? Yes ✓

Generators, do they comply with the requirements regarding rating? Yes ✓, are they compound wound? Yes ✓

are they over compounded 5 per cent? Yes ✓, if not compound wound state distance between each generator

Where more than one generator is fitted are they arranged to run in parallel? —, is an adjustable regulating resistance fitted in series with each shunt field? —

Are all terminals accessible, clearly marked, and furnished with sockets? Yes ✓, are they so spaced or shielded that they cannot be accidentally earthed, short circuited, or touched? Yes ✓

Are the lubricating arrangements of the generators as per Rule? Yes ✓

Position of Generators Engine room Port.

is the ventilation in way of the generators satisfactory? Yes ✓, are they clear of all inflammable material? Yes ✓

if situated near unprotected woodwork or other combustible material, state distance of same horizontally from or vertically above the generators

— and —, are the generators protected from mechanical injury and damage from water, steam or oil? Yes ✓

are their axes of rotation fore and aft? Yes ✓

Earthing, are the belylats and frames of the generating plant efficiently earthed? Yes ✓, are the prime movers and their respective generators in metallic contact? Yes ✓

Main Switch Boards, where placed Aft of Generator

If the generators and main switchboard are not placed in the same compartment, is each generator provided with a fuse on each insulated pole as near as possible to the terminals of the generator, additional to that provided on the main switchboard? —

Switchboards, are they placed in accessible positions, free from inflammable gases and acid fumes? Yes ✓

are they protected from mechanical injury and damage from water, steam or oil? Yes ✓, if situated near unprotected woodwork or other combustible material, state distance of same horizontally from or vertically above the switchboards? — and —

are they constructed wholly of durable, non-ignitable non-absorbent materials? Yes ✓, is all insulation of high dielectric strength and of permanently high insulation resistance? Yes ✓

if semi-insulating material is used, are all conducting parts insulated from the slab with mica or micaite or other non-hygroscopic insulating material, and the slab similarly insulated from its framework? —

and is the frame effectively earthed? Yes ✓

Are the fittings as per Rule regarding: — spacing or shielding of live parts? Yes ✓

accessibility of all parts? Yes ✓, absence of fuses on back of board? Yes ✓, proportion of omnibus bars? Yes ✓

individual fuses to voltmeter, pilot or earth lamp? Yes ✓, connections of switches? Yes ✓

Main Switchgear, description of switchgear for each generator and each outgoing circuit, and arrangement of equalizer switches.

200 Amp. D.P. Switch. 2 — 200 S.P. fuses

Instruments on main switchboard One ammeters One voltmeters — synchronising device for paralleling purposes.

Earth Testing, state what means are provided at the main switchboard for indicating the state of the insulation of the system.

Lamp from each pole to earth

Switches, Circuit Breakers and Fusible Cut-outs, do these comply with the requirements of the Rules? Yes ✓

Joint Boxes Section and Distribution Boards, is the construction, protection, insulation, material, and position of these as per rule? Yes ✓

Cables: Single, twin, concentric, or multicore Single - Twin, are the cables insulated and protected as per Tables IV or V of the Rules Yes

Fall of Pressure, state maximum between bus bars and any point of the installation under maximum load 3 Volts

Cable Sockets and other connections, are the ends of all cables having a sectional area of 0.04 square inch and above provided with soldering sockets Yes

Paper Insulated Cables. If cables are paper covered, is the dielectric at the exposed ends of the conductor protected from moisture by being suitably sealed with insulating compound Yes

Cable Runs, are the cables fixed as far as possible in accessible positions not exposed to drip or accumulation of water or oil, or to high temperature from boilers, steam pipes, uptakes or other hot objects, or to avoidable risk of mechanical damage Yes

Support and Protection of Cables, state how the cables are supported and protected Lead covered - Brass saddles.
Is Lead covered - armored - Galvanized clips.

If cables are run in wood casings, are the casings and caps secured by screws Yes, are the cap screws of brass Yes, are the cables run in separate grooves Yes. If armored and lead covered cables are secured by metal clips, are the clips spaced as per Table VIII Yes

Refrigerated Chambers, if lights are fitted, are the cables and fittings in accordance with the special requirements Yes

Joints in Cables, state if any, and how made, insulated, and protected None

Watertight Glands and Deck Tubes, are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands Yes

Bushes in Beams and Non-watertight Partitions, where unarmoured cables pass through beams and non-watertight partitions, are the holes efficiently bushed Yes. state the material of which the bushes are made Lead

Earthing Connections, state what earthing connections are fitted and their respective sectional areas Yes, are their connections made as per Rule Yes

Alternative Lighting, are the groups of lights in the propelling machinery space arranged as per Rule Yes

Emergency Supply, state position and method of control of the emergency supply and how the generator is driven Yes

Navigation Lamps, are these separately wired Yes, controlled by separate switch and separate fuses Yes, are the fuses double pole Yes, are the switches and fuses grouped in a position accessible only to the officers on watch Yes, has each navigation lamp an automatic indicator as per Rule Yes

Secondary Batteries, are they constructed and fitted as per Rule Yes

Fittings, are all fittings on weather decks, in storerooms and engine rooms and where or exposed to drip or condensed moisture, watertight Yes, are any fittings placed in spaces in which goods are liable to be stacked in close proximity to them; if so, how are they protected Protected with L.S. guard and dead-light cover, are any fittings placed in spaces where inflammable or explosive dust or gases are liable to be present, if so, how are they protected Yes, how are the cables led Yes, where are the controlling switches situated Yes

Searchlight Lamps, No. of Yes, whether fixed or portable Yes, are their fittings as per Rule Yes

Arc Lamps, other than searchlight lamps, No. of Yes, are their live parts insulated from the frame or case Yes, are their fittings as per Rule Yes

Motors, are their working parts readily accessible Yes, are the coils self-contained and readily removable for replacement Yes, are the brushes, brush holders, terminals and lubricating arrangements as per Rule Yes, are the motors placed in well-ventilated compartments in which inflammable gases cannot accumulate and clear of all inflammable material Yes, are they protected from mechanical injury and damage from water, steam or oil Yes, are their axes of rotation fore and aft Yes, if situated near unprotected woodwork or other combustible material, are the motors of the totally enclosed, pipe ventilated, forced draught, drip or flame proof type Yes, if not of this type, state distance of the combustible material horizontally or vertically above the motors Yes and Yes

Control Gear and Resistances, are the generator field and motor speed regulators, starters and controllers constructed and fitted as per Rule Yes

Lightning Conductors, where lightning conductors are required, are these fitted as per Rule Yes

Ships carrying Oil having a Flash Point less than 150° F. Have the special requirements of the Rules been complied with regarding switches, joint boxes, section and distribution boards, protection of cables, method of distribution, lead of cables, lights and fittings Yes

If portable lamps for use in dangerous spaces are supplied, are they of a type approved by the Home Office Yes

All Conductors are of annealed copper conforming to British Standard Specification No. 7.

The Insulated Conductors are guaranteed to withstand the immersion and resistance tests specified in the Rules.

The foregoing is a correct description.

Loup Curtis & Co. Ltd.

Electrical Engineers.

Date Feb. 21/28

per J. Ryan

COMPASSES.

Distance between electric generators or motors and standard compass 10 ft. (Fan Motor)

Distance between electric generators or motors and steering compass 15 ft. (Fan Motor)

The nearest cables to the compasses are as follows:—

A cable carrying 6. Amperes 10. feet from standard compass 14 ft. feet from steering compass.

A cable carrying ✓ Amperes ✓ feet from standard compass ✓ feet from steering compass.

A cable carrying ✓ Amperes ✓ feet from standard compass ✓ feet from steering compass.

Have the compasses been adjusted with and without the electric installation at work at full power. yes

Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted. yes

The maximum deviation due to electric currents was found to be ✓ degrees on ✓ course in the case of the standard compass, and ✓ degrees on ✓ course in the case of the steering compass.

Ramage & Ferguson, Limited

Alex. J. Ferguson.
DIRECTOR & SECRETARY

Builder's Signature.

Date 27 Feb 28

Is this installation a duplicate of a previous case. No. If so, state name of vessel.

General Remarks (State quality of workmanship, opinions as to class, &c.)

This installation has been fitted in the vessel in accordance with the Rules.

The materials and workmanship are good. The installation has been tried under working conditions & found satisfactory.

It is submitted that this vessel is eligible for THE RECORD. Elec. light.

W.D.
29/2/28

Total Capacity of Generator 20 Kilowatts.

The amount of Fee ... £ 17 : 10 : 18 Feb 28

Travelling Expenses (if any) £ ✓ : : 21/2/28
