

DELTA TELLO.

HMCS 19106.

of the engine when dechlorinated.

Are the exhaust pipes and su

Pelau Tello.

Bot. 9106.

It is concluded that the safety
valves of the waste heat Boiler are
double spring loaded, aggregate area 950"
fitted with easing gear & adjusted to 72 lb
as in the case of sister vessels but this
should be confirmed.

JRT

Bot. 17/1/30.

What pipes pass through the bunkers.....

None

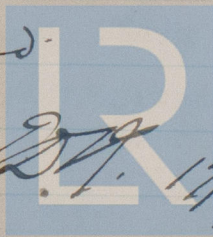

How are they protected.....

What pipes pass through the deep tanks.....

None

Have they been tested as per Rule.....
