

POSTPONED SURVEYS.

Case of the Stm. Tlr. "SKALABERG"

No. 26946 in Reg. Bk. _____ tons, Built _____

Classed _____ Owners _____

Port of Registry _____

Survey Due Special Survey due 11.50
Boiler Survey due 5.51.
 Indented shell plate in B strake in way of machinery
 space (p.s.) and corroded shell, plate C. 3 (s.s.) to
 be dealt with by the Special Survey.

On the 30th April last the Thorshavn Surveyor was informed that, provided he was satisfied with the condition of the vessel, the proposal to carry out the Special Survey by the 1st October would be approved. He was further informed that as no part of the machinery had been seen since April, 1946, he should satisfy himself as to the efficiency of the machinery under working conditions. The hull of the vessel was found satisfactory in March, but as regards the machinery the Surveyor stated that as the vessel had been laid up since April 30th he had had no opportunity to examine the same under working conditions. Action was accordingly deferred on the understanding that the Special Survey would be carried out before the vessel resumed service.

The attached letter has now been received from the Thorshavn Surveyor.

Committee's Minute _____

Decision _____

Deferred
must by end
Nov.

(Submitted Action be deferred for a short time pending further information regarding ship's disposal.
