

**POSTPONED SURVEYS.**

Case of the Steam Trawler "SKALABERG" No. 76683 in R.B.

Built..... Owners.....

Class..... Port of Registry.....

Surveys due Special Survey due 11.50 Last Docked 3.51

Boiler Survey due 5.51  
Indented shell plate in B strake in way of machinery space (ps) and corroded shell plate C.3 (ss) to be dealt with by the Special Survey.

Proposed to be held by October 1st 1951.

Remarks On the 30th April last the Thorshavn Surveyor was informed that the proposal to postpone the Special Survey until 1st October was approved provided he was satisfied with the condition of the vessel for this deferment. He was further informed that, as no part of the machinery has been seen since April, 1946, he should satisfy himself of the continued efficiency of the machinery by an examination under working conditions.

The vessel was examined on the slipway in March last and the condition of her hull found satisfactory for the proposed postponement. As regards the machinery, the Thorshavn Surveyor states in a letter dated 18th August as follows:-

Chief Surveyors' recommendations Submitted action continues to be deferred.

POSTPONED SURVEY

Stm. Tlr. "SKALABERG".

-2-

"The vessel has been laid up since I had your letter of April the 30th so I have had no opportunity to examine the machinery working. The Owners do not intend to put the vessel into service again before Special Survey has been carried out."
