

# Lloyd's Register of Shipping,

Toldbodgaten 20,

Oslo, 14th June 1927

Enclosures.

Reference

Dear Sir,

Referring to our cables of the 10th and 11th instant and yours of the 11th instant we beg to enclose herewith plans showing the position of the proposed whale oil tanks in lower tween deck of the steamer "N.T. NIELSEN-ALONSO", and a plan of lower tween deck showing the position of the new bulkheads proposed, and of the original bulkheads proposed to be re-inforced.

As the deeptanks were constructed for a pressure height of 8 feet above the tankdeck the owner now proposes to fit overflow pipes from the deeptanks leading into lower tween deck 8 feet high above tanktop as per plan A. Alternatively the owner proposes to fit air pipe (overflow pipes) leading to upper tween deck as per plan B. In the last case the pressure height for the deeptanks will be 9'-6", viz 1'-6" higher than subjected by approbation and under the construction of these tanks.

Pressure height for the new tween deck tank about 3'-6" above tweendeck tank top.

We are, Dear Sir,

Yours faithfully

THE SECRETARY
