

s.s. "N.T.NIELSEN ALONSO"

It is submitted it be pointed out to the Surveyors that the plan forwarded is incomplete and indistinct, and is not such as should have been submitted to this Office for consideration,

To enable the equipment number to be computed, the plan should be completed to show clearly the lengths and character of the various erections, with figured dimensions.

The Framnes Mek. Verks. should first make their own calculation of the new equipment number so far as the deck erections are concerned and indicate this on the plan.
