The Glasgow Surveyors write stating that the weights of the anchors supplied for the vessel are as follows :-

The anchors required by Table 22 being :-

1st bower, stockless	87.	0.	0

It will be seen that the collective weight of the three bower anchors is 27 lbs. less than required by Table 22, but the 1st and 3rd bowers, and also the stream and kedge anchors are in excess of the weight required.

It is submitted under the circumstances that the anchors might be approved for the figure 1.
