

RUSTON & HORNSBY ENGINE NO.241110
Type 8VGBXM - 0/No.13/450053.
Cochrane & Sons Ltd. Yd.No. 1319

IT IS SUBMITTED the Nottingham Surveyors be informed with reference to the second paragraph of their letter that the proposal made by the Firm to take vibration records during the trials and to suitably mark the tachometer over a speed range of 10 R.P.M. in way of the 8th order 3 node critical speed is considered satisfactory.

With reference to the third paragraph wherein it is stated that the engines will never run continuously below 130 R.P.M. the Firm should be informed that in the circumstances it will be unnecessary to fit a notice board relating to a speed limitation for the 4th order 1 node critical speed.
