

Total under Upper Dk. 589.173

Depth, at middle of length from top of keel to top of beams at side of uppermost Continuous Deck

37.67

Year of Appointment

In view of the great difficulty which is already anticipated in carrying through the printing of the Register Book this year, it is not proposed to omit the prefix "W.B." (i.e., Water Ballast) from existing records of double bottoms in the Register Book for the forthcoming edition. To do so would be a work involving very much labour and time which cannot be spared in the Composing Room at the Printing House.

The records will, however, be put on a uniform basis when normal times recur.

General Committee
Thursday, 17th February, 1916.
