

I spoke to Mr. Cordran on the telephone this morning regarding the cases of the Steamers "ANN W" and "HAWTHORN". He stated that his Firm had no direct interest in these vessels but that the "HAWTHORN" had been sold for demolition and that breaking up had commenced.

He added that the "ANN W" is still laid up at Rochester and that should it be intended to place her in commission application would be made by interested parties to this office for permission to postpone the Special Survey. He emphasized that his only connection with these vessels had been in a consultative capacity.
