

COPY.

29th May, 1907.

Gentlemen,

With reference to the First Entry reports on the machinery for the Steam Drifters "CITY OF EDINBURGH" and "CITY OF LONDON", it is not clear from the reports whether the balance of the total fee for special survey during construction has been applied for. One third of the total fee of £8 was applied for from London for the survey of the engines, in each case, and the Newcastle Surveyors applied for £2-8-0 for the survey of the boiler. The difference between the total of these amounts and £8 should be applied for from Hull, and I shall have therefore to request that you will collect this balance, viz:- £2-18-8 in each case.

I am, Gentlemen,

Your obedient servant,

Secretary to the
Classification Committee.

The Surveyors,

HULL.
