 S.S. No 1 - 25

by due Screwshaft Survey due November, 1926.
 Boiler Survey due February, 1927.

In December last the Barcelona Surveyor stated the vessel was lying in a damaged condition at Havana and would require to be drydocked and have the screwshaft examined.

The Barcelona Surveyor now states the vessel was extensively damaged in a cyclone about six months ago and is still laid up at Havana, and that the Owners can make no definite arrangements in regard to the Boiler Survey.

N.B. According to Returns received from the Havana Surveyor the vessel is under survey at that port for Damage.
