

Wood Motor Yacht "FLYING CLOUD" ex "ELIZABETH RUTH"

This vessel has recently been submitted for Annual Survey at Southampton, when it was found that parts of the vessel were very badly affected through dry rot.

Mr. Nicholas was specially deputed to hold the Annual Survey in view of her reported defects, and he states he is of opinion that a large quantity of green and unseasoned material was used in her construction, and owing to the present lack of proper ventilation dry rot has quickly set up.

The Southampton Surveyors now state they are advised by the Owner's Representative that it is not his intention to continue the vessel's classification in the Register Book.

It is submitted, in these circumstances, that the Yacht's class should be expunged with a black line from the Yacht Register.
