31-32, Oxford Street,

Southampton June 6th., 1924.

LLOYD'S REGISTER  
Recd. 7 JUN. 1924  
Ans'd. 10  
LONDON

Secretary,  
LONDON.

Sir,

With regard to the Yacht "FLYING CLOUD", it is proposed to fit Manganese Bronze propeller shafts, in place of the present steel shafts owing to the very heavy corrosion taking place in the latter.

These shafts would be 5" diameter, the same size as the largest diameter of the present shafts. We should be glad to know whether these would be approved, and would esteem it a favour if this information could be sent by telegram on Tuesday morning.

We are, Dear Sir,

Yours faithfully,

G. A. Dryden Toynne  
pro the Surveyors.
