G. MAJEN, B.Sc.
M. MICALICH.

Dear Sir,

With reference to Genoa letter of 15th instant I am informed by Mr. Ormiston that he has had a talk with Mr. Barbour who is to represent the Owner during the construction of the new steel hull of this yacht.

Mr. Barbour's present intention is to reside at Leghorn where it is understood the new hull will be built by Messrs Orlando and it is stated the building and equipping of the vessel will take about 12 months.

It is also stated that the Captain of the yacht will stay in attendance at Leghorn during the building.

The Society's Leghorn Surveyor is non-exclusive and Mr. Barbour has been enquiring what arrangements for survey during construction are proposed to be made.

It is considered that provided the usual plans be submitted for approval and in view of the experience and supervision of Mr. Barbour who was a Ship Surveyor to the British Corporation for many years, the ordinary periodical

W1104 - 0120 1/2

visits during construction might be undertaken by the Society's non-exclusive Ship & Engineer Surveyor at Leghorn with say four visits of an exclusive Ship Surveyor from Genoa.

These visits could be at the following periods:-

- (1) Double Bottom erected.
- (2) Vessel framed.
- (3) Vessel plated.
- (4) Completion.

Should it be desired by the Owners representative to have any additional visits from Genoa to discuss any special details on the spot a letter could be sent by him to the Genoa Office asking for a Ship Surveyor to attend.

It is submitted such an arrangements would be satisfactory as the machinery taken from the existing yacht is to be installed in the new hull.

I am, Dear Sir,

Yours faithfully,

H. G. Lumbell.

The Secretary,
LONDON.

London Letter 111A.

I am, Dear Sir,

in regard to the new mill.

As the machinery taken from the existing works

is in a satisfactory condition and arrangements would be made for the Genos Office taking for a mill to be erected adjacent to the site on the spot a letter would be sent by post to have any additional details from Genos to discuss any

points if required by the Owners representative

- (1) Completion
- (2) Lease of land
- (3) Lease of land
- (4) Double Bottom erected.

These details could be in the following order:-
Genos.

There will be no change of an existing mill to be erected, a non-existing mill & Engineer Genos at the existing construction might be suggested by the
