

# Clyde Steamship Company.

Pier 36, North River,

New York.

Sept. 23, 1915.

H. H. Raymond,  
PRES. & GEN. MGR.

Lloyd's Register of Shipping,  
17 Battery Place,  
New York City.

Gentlemen:-

YAQUE, YUNA & INCA

With reference to changing the warps for the above ships building at the Great Lakes Engineering Works, Detroit, Mich., Yard Nos. 147-8-9; we wish to make the following substitution:

100 fathoms of 7" manila and four 3/8" durable wire fasts, each 40 fathoms long instead of 180 fathoms of 6" manila and 180 fathoms of 5" manila.

Because of our special trade requirements we wish to make the substitution of warps for these ships which is the practice for ships of the Clyde Line. Therefore, if you will please grant this substitution under your Classification, it will be appreciated.

Yours very truly,

m/a

President.
