No. 25 Port of Registry Seattle
and specially treated

Donkey Boiler Survey due January, 1927.
Special Survey equal to a Half Time Survey
due September, 1927.

In August last the Committee deferred action in
this case subject to the Donkey Boiler Survey being
carried out before the vessel again proceeded to sea
from Seattle to which port she was expected to return
during the latter part of September.

In reply to further enquiry the Seattle Surveyor
states that he is informed that this vessel is still laid
in Lake Union. The Owners add that as soon as a charter
is secured they will place the vessel in drydock.
